

Fungaflor® TR

Dry Micro Total Release Fungicide

 **BASF**

The Chemical Company

Get Broad-Spectrum Control With the First Total Release Fungicide

Prescription Treatment® brand **Fungaflor TR** Dry Micro Total Release Fungicide — the first total release fungicide with broad-spectrum prevention and control of plant diseases. Applying fungicides is easier than ever with **Fungaflor TR**, and it's a great addition to your fungicide rotation program.

Fungaflor TR Benefits

- **Fungaflor TR** prevents and controls botrytis, the number one foliar disease in the greenhouse market.
- The dry formulation of **Fungaflor TR** significantly reduces the risk of spreading foliar diseases.
- Ready-to use-formulation, with no mixing or measuring required.
- Easy to apply; saves time and labor costs.
- A single 2-oz. can covers up to 1,500 sq. ft.

Diseases Controlled

Fungaflor TR can be used for the prevention and control of the following diseases:

- Alternaria
- Botrytis
- Downy Mildew
- Powdery Mildew
- Rust

Dry Micro Total Release Fungicide

Keys to Success

- Labeled rates are disease-specific (please read the entire label before making applications).
- The top of the Total Release canister should be at or above the plant canopy before application.
- Clear out a three-foot area around the canister to prep for application.
- Canister should be at room temperature during application.
- Close all vents and doors.
- Shut down HAF fans just before or just after activating cans. HAF fans should remain off for a minimum of three hours or all night.
- For single-level crops, choose the low rate; for multiple-level crops choose the high rate.

Always read and follow label directions.
