

Pyreth-It® Formula 2 Pyrethrum Insecticide

 **BASF**
The Chemical Company

Pyreth-It® Formula 2 Pyrethrum Insecticide — A Concentrated, Botanical Insecticide — Kills A Wide Range Of Insects Fast!

Pyreth-It Formula 2 is highly irritating to insects, flushing them into the open. This flushing activity is very beneficial when controlling insects that are hidden in flowers or under leaf surfaces, as increased insect activity during spraying means better contact and better kill.

- Zero pre-harvest interval
- Use alone or tank-mix to increase the killing potential of your favorite insecticide
- Pyrethrum, plus a high PBO concentration, flushes insects from their hiding places, making them more susceptible and resulting in better insect kill and control
- Economical – low cost-in-use
- Fast knockdown with low risk to crops and the environment
- Spray today and see dead bugs tomorrow

Pests Controlled

Pyreth-It Formula 2 effectively controls 40 insect pests, including:

- Aphids
- Caterpillars
- Crickets
- Fruit Flies
- Leafhoppers
- Silverfish
- Thrips
- Whiteflies
- And More

Use Sites: Outdoor and greenhouse crops such as ornamentals, nursery stock, fruits and vegetables

Packaging: 4x1 gallons/case

Active Ingredient: 6% Pyrethrins

Class: Botanical

Active Ingredient: 60% Piperonyl Butoxide

Class: Synergist

Mode of Action: Group 3 Sodium Channel Modulator

Signal Word: CAUTION

REI: 12 hours

PPE: Coveralls; chemical-resistant gloves; shoes plus socks; protective eyewear

Application Tips

Greenhouse and Outdoor Nursery Rate

(Conventional Hydraulic or Airblast Sprayers)

Used Alone: Combine 6-12 oz. with 100 gallons of water.

Tank-Mixed: Combine 1-4 oz. and proper amount of compatible insecticide to 100 gallons of water.

Outdoor Nursery Rate (Low-Volume Mist Sprayers)

Used Alone: Combine 6-12 oz. with 10 gallons of water.

Tank-Mixed: Combine 1-4 oz. and proper amount of compatible insecticide to 10 gallons of water.

Use the lowest label rate for plants in color or bloom (some plants may be more susceptible to phytotoxicity; test a small area before widespread use).

Always read and follow label directions.
