Total Release Products

Convenience in a can: The portable ULV system from BASF

The Total Release line of products provides a quick, convenient way to control disease and insect pests in ornamental plants. A portable ultra-low volume (ULV) system in a can, this exclusive delivery system is designed for use in enclosed greenhouses, anytime during the production cycle.

The ready-to-use formulation can be used on almost all crops, including blooming plants, and delivers effective disease and insect control overnight. Fast and easy to apply, Total Release products minimize interruptions and worker exposure. Your operation will save time and labor, and you can get back to business.

- **Quick, convenient application:** The Total Release ULV aerosol can be applied in three simple steps: *Locate*, *Lock Down*, and *Leave*.
- **Effective disease and pest control:** For superior plant protection, include Total Release products in your disease and mite/insect pest control management programs.
- **Less interruption and worker exposure:** With its ready-to-use formulation and fast, easy application, this portable ULV system minimizes interruption and reduces worker exposure concerns.

Total Release Products

Total Release products can be used on bedding plants, cut flowers, flowering hanging baskets, foliage, potted flowering plants and ornamentals in commercial greenhouses. This ultra-low volume aerosol system requires 1-2 aerosol cans per 3,000 square feet, depending on the pests and diseases.

1300 Orthene® TR

Micro Total Release Insecticide

This broad-range insecticide controls a number of key insects, including spider mites, thrips, whiteflies, aphids, mealybugs, fungus gnats and scale.

Attain® TR

Micro Total Release Insecticide

A pyrethroid formulation, this broad-range insecticide controls mites, thrips, whiteflies, aphids, mealybugs, fungus gnats and scale.

Beethoven® TR

Miticide/Insecticide

This is an excellent space mix partner with **Pylon® TR** total release insecticide for quick knockdown, added pest control and resistance management. It controls spider mites and provides suppression of whiteflies.

Duraplex® TR

Micro Total Release Insecticide

This restricted-use pesticide controls mites, thrips, whiteflies, aphids, mealybugs, fungus gnats, shore flies and scale. Refer to label for specific use conditions.

Pageant® TR

Intrinsic® Brand Fungicide

This fungicide delivers superior foliar disease control, protecting plants against seven key foliar diseases: *Alternaria*, *Botrytis*, *Cercospora*, *Cylindrocladium*, *Myrothecium*, powdery mildew and rust (*Uromyces*).

Pylon® TR

Total Release Insecticide

Designed to control mites, spider mites, thrips and fungus gnats, this insecticide is an excellent space mix partner with **Beethoven TR** miticide/insecticide.

Pyrethrum® TR

Total Release Insecticide

This pyrethroid formulation, which controls mites, thrips, whiteflies, aphids, mealybugs and more, partners well with **1300 Orthene TR** or **Duraplex TR** micro total release insecticides for added pest control and resistance management. The most restrictive label applies when combining with other Total Release insecticides.

Trinity® TR

Total Release Fungicide

This fungicide controls *Alternaria* spp., *Botrytis* spp., *Cercospora*, *Cylindrocladium* spp., *Fusarium* spp., *Myrothecium* spp., powdery mildew and *Rhizoctonia* spp.

For a complete list of product details, including diseases and insects controlled, consult product labels at CDMS.net.

Always read and follow label directions.
